

LO: To investigate living things.

C: To identify that most living things live in habitats to which they're suited and describe how different habitats provide the basic needs of different kinds of animals and plants and how they depend on each other.

Cut and stick the labels to show how living things in the rainforest depend on each other.

How do humans depend on other living things to survive?

Monkeys live in trees and eat fruit, insects, frogs and birds.

Trees give shelter and food to animals.

Jaguars eat deer, monkeys, frogs, snakes and fish.

Deer shelter in fallen leaves and eat leaves, grass, fruit and berries.

Birds eat fruit and scatter seeds so new trees can grow.

Snakes live in fallen leaves and eat insects and frogs.

Insects shelter in trees and eat the leaves.

Frogs shelter in trees and eat the insects.
