I am the male part of
the plant.

I am the female part of
the plant

I am part of the Carpel.
I am located at the top
of the Carpel. I am
so that the pollen can
stick to me.

I am part of the Carpel.
Like a stem I hold up
the I am hollow so
that the pollen can
travel down into the

I am part of the Carpel.
I hold the
..... takes place in me.

I am important for both pollination and fertilisation. I am and to attract I produce pollen which joins to eggs to produce new When I die a new fruit grows with seeds.

We are important for
Photosynthesis. We use
..... to turn and
into food. We are very
important for nutrition
and getting rid of
waste.

We are important for
Photosynthesis. We
soak up water for the
plant to use in We
also keep the plant in
the so it doesn't
blow away.

I am important for in
Photosynthesis. I hold
up the plant towards
the sunlight. I
transport water and
from the to all parts
of the plant.

I protect the plant
while it is still growing
from a
