

7a. Find the digit card that matches each calculation.

A. $22.08 \times 10 =$

B. $11.11 \times 1,000 =$

C. $1.909 \times 10 =$

D. $60.31 \times 100 =$

PS

8a. Claudia multiplies 3.102 by 10 and then by 100. She says,

The 1 will move from the tenths column to the hundreds column and the 0 will move from the tenths column to the hundreds column.

Is she correct?
Explain why.

R

9a. Complete the table.

	19.098	24.88	100.56
x 10			
x 100			
x 1,000			

PS
