

4b. Find the digit card that matches each calculation.

A. $70.1 \times 100 =$ 7,001 700.1 7,010

B. $0.862 \times 1,000 =$ 8,620 862 80.62

C. $11.9 \times 10 =$ 11.90 110.9 119

PS

5b. Hanif multiplies 1.03 by 1,000.

He says,

The 0 will move from the tenths column to the hundreds column.

Is he correct?
Explain why.

R

6b. Complete the table.

	0.44	15.628
x 10		
x 100		
x 1,000
