7a. Use the clues to find the missing digits.

An odd number.

These digits add together to make 9.

$6\frac{\square}{12} = \frac{\square\square}{4}$

Show your working.

GD

PS

7b. Use the clues to find the missing digits.

The numerator is a factor of the denominator.

These digits have a difference of 7.

$7\frac{\square}{8} = \frac{\square\square}{4}$

Show your working.
