

Tuesday

**Your challenge:**

- Can you convert between metric units?

**What to do:**

1. Find 15 items in your house that you can measure the length of easily.
2. List the items on the table on the Challenge 10 sheet. Find the measure of your item in cm then convert your measure to mm, m and km.

- Items to measure

## Challenge 10 Sheet Converting units

Measure and convert the measures of objects around your house.

Item	Measure (cm)	Measure (mm)	Measure (m)	Measure (km)

Wednesday

Century tech- Diagnostic test in measurement

Thursday

Have a go with the Ultimate timestable test 1 sheet (Y5). If it's too challenging try the other Ultimate timestable challenges.

Friday

Create a poster of how to convert between measurements. Have a look at the PPT presentation and click on the sound button to hear my explanation to help you.
