

Computing

This week, we're going to build on our knowledge of designing 3D computer games. We're going to customise our game this week.

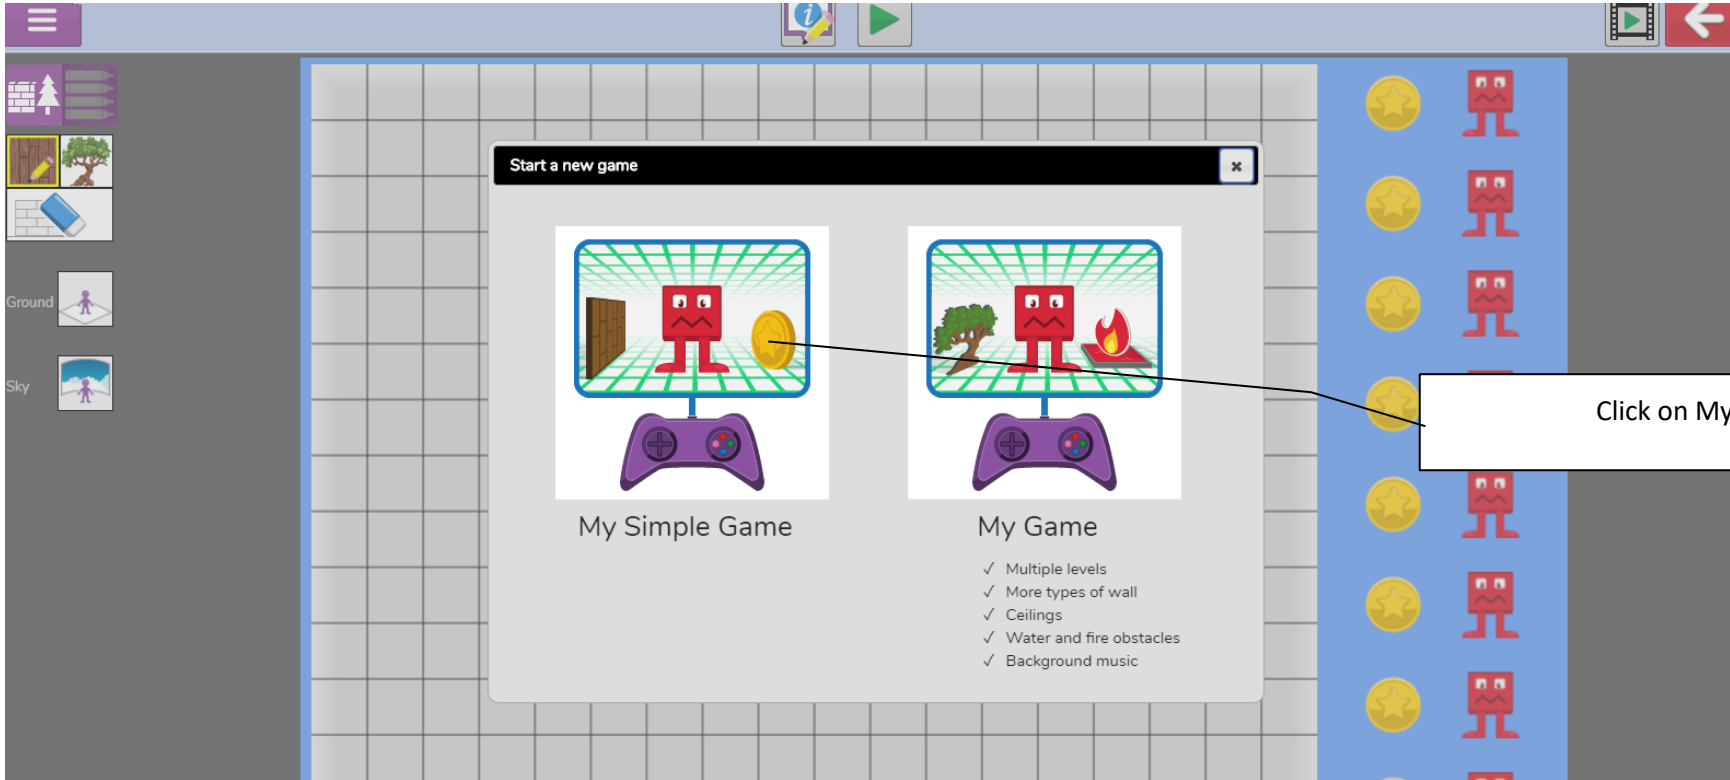

Log into Purple Mash. You'll need to go via Binfield School's portal, which is at <https://www.purplemash.com/sch/binfield>

You'll need to enter your login details and then select "2Dos" at the top left of the page. Once you do this, your screen will look like the picture below. The task contains instructions for what to do. Please remember to save your tasks once you have finished. The task this week is called: "2DIY 3D".

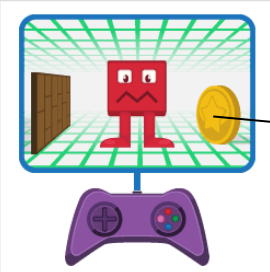

The screenshot shows the Purple Mash interface. At the top, there is a navigation bar with icons for Home, 2Dos, Work, Data, Sharing, Teachers, Admin, and Help. Below this is a purple header bar with a search box and buttons for 'Select All', 'Unselect All', 'Close Selected', and 'Refresh'. The main content area is blue and displays a task titled '2do: 2DIY 3D' with a red robot icon. The task description reads: 'Design, play and share your own 3D game. Watch the tutorial and experiment with creating your own game for someone at home to play. (Assigned to everyone in classes: 6JS,6KM)'. Below the task title are buttons for 'Edit', 'Close', 'View Folder '6JS'', and 'View Folder '6KM''. A callout box points to the '2Dos' button in the navigation bar, stating: "2Dos" can be accessed by clicking this button. Another callout box points to the task title, stating: This is the computing task for this week – it'll appear on Friday.

Start a new game

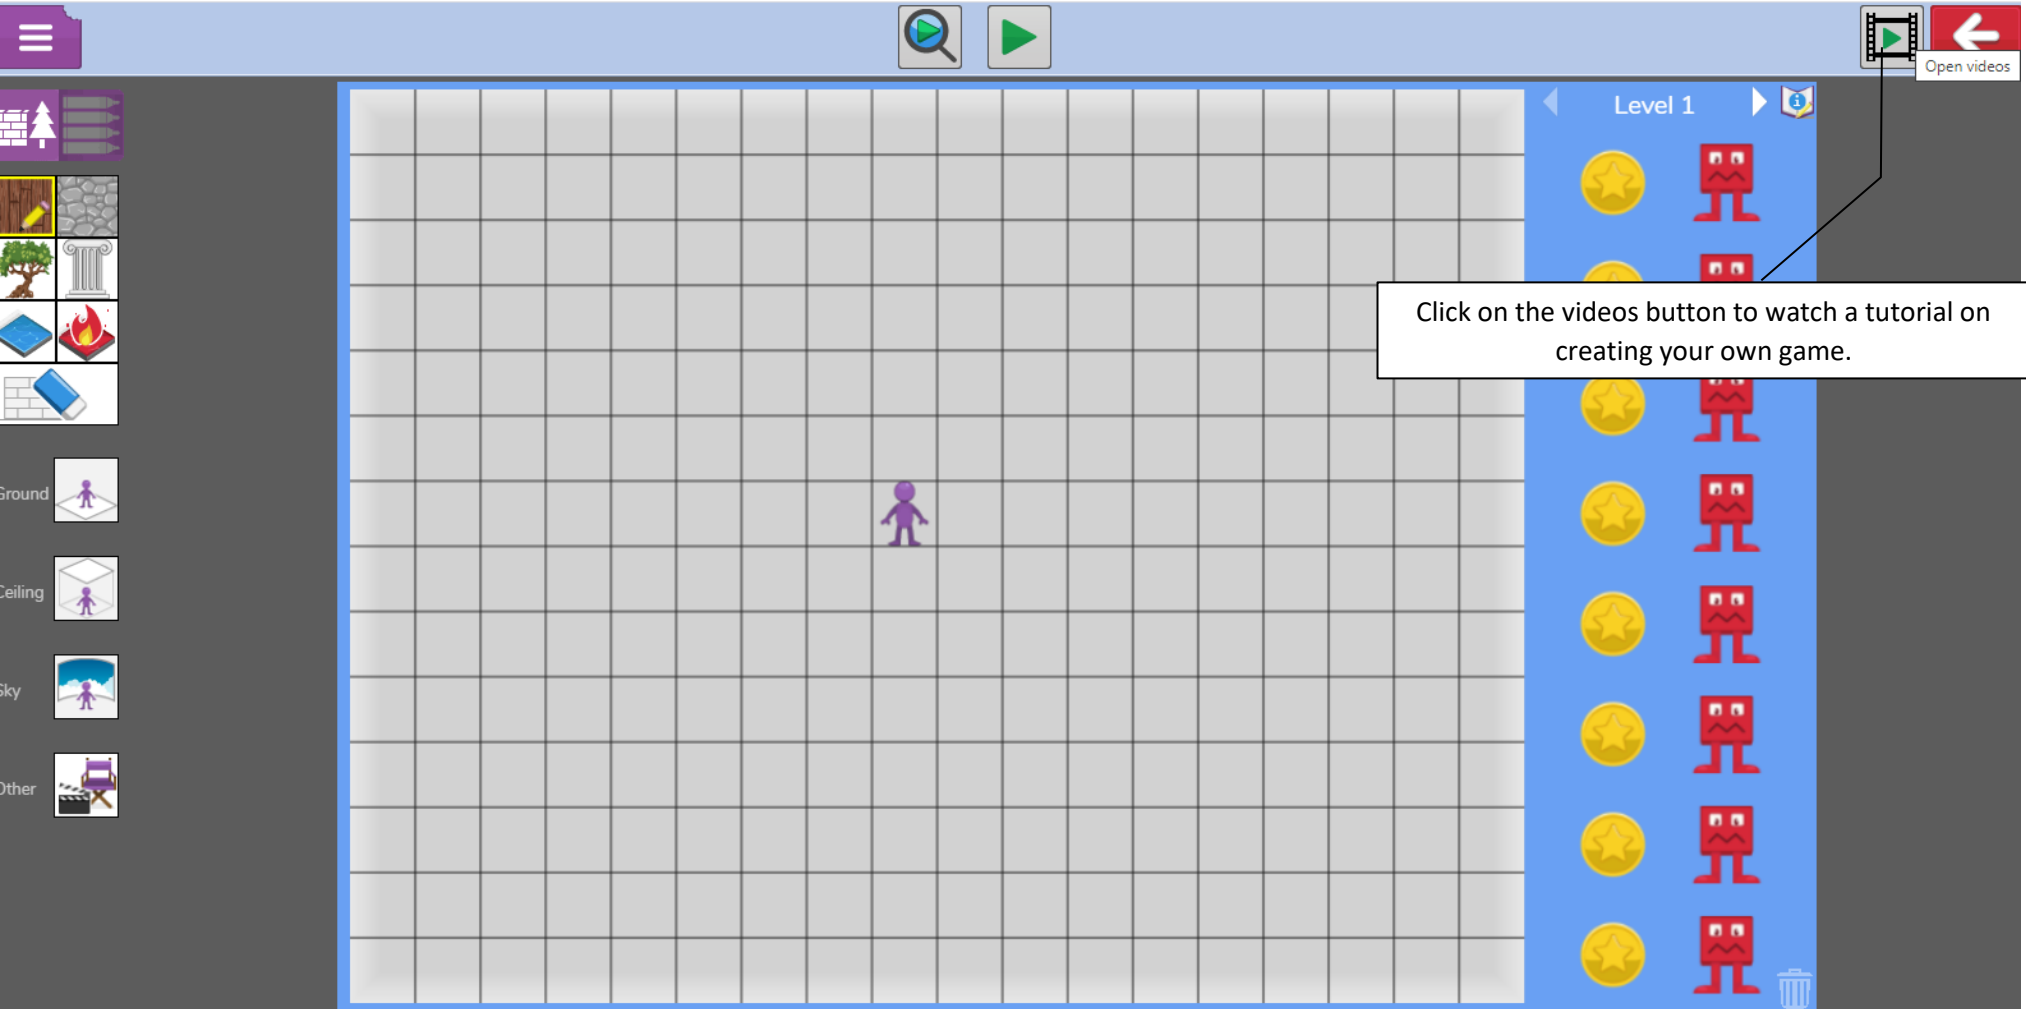

My Simple Game

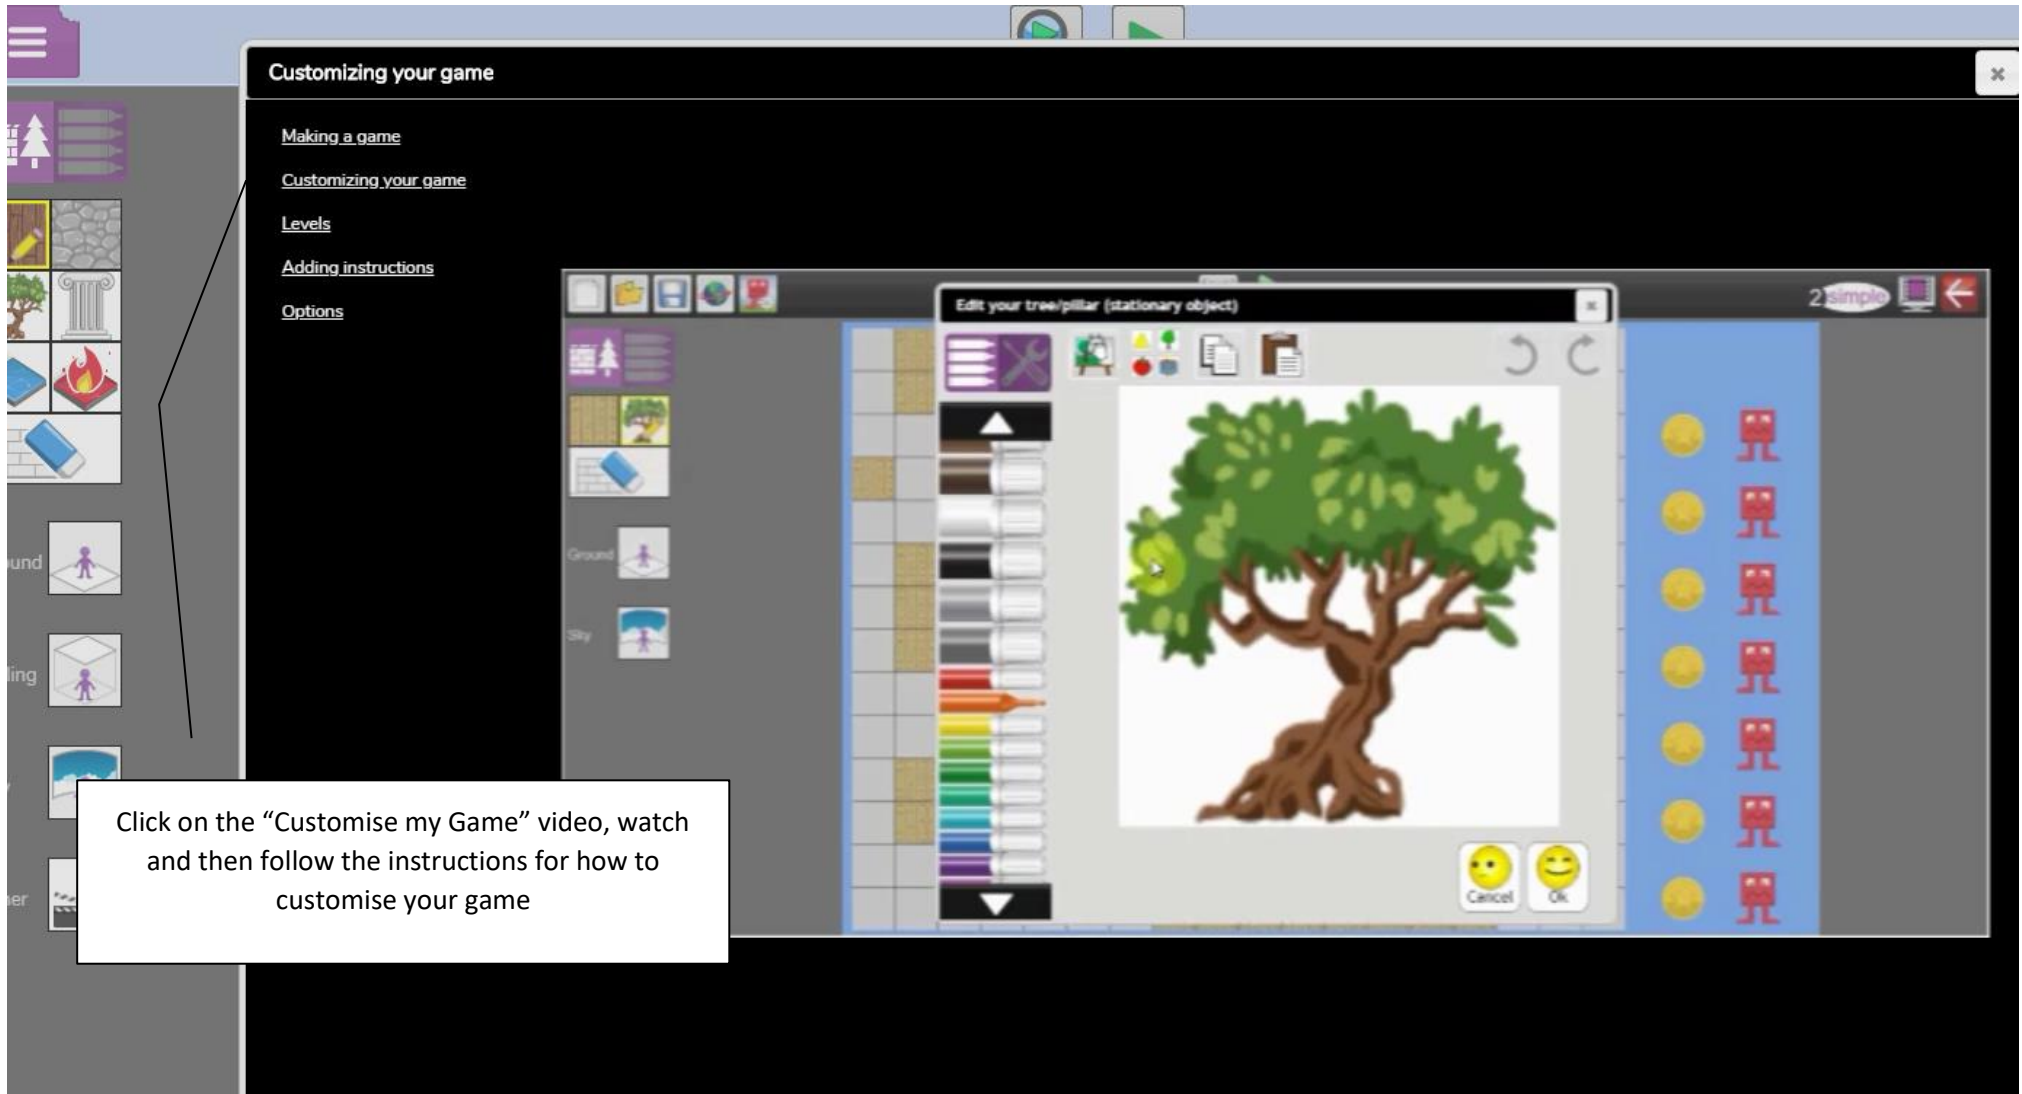

My Game

- ✓ Multiple levels
- ✓ More types of wall
- ✓ Ceilings
- ✓ Water and fire obstacles
- ✓ Background music

Click on My simple Game

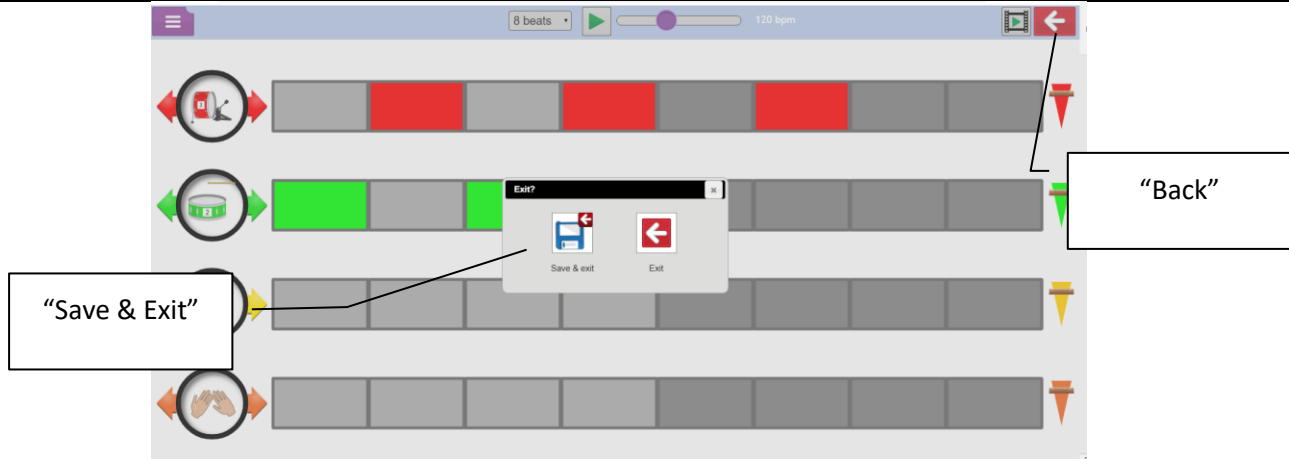

Click on the videos button to watch a tutorial on creating your own game.

After you have finished each task, it is important that you save your work in the correct place. Do this by following these steps:

Click the red "Back" arrow on the top right of the page.

Then click "Save & Exit".

Select either "6JS" or "6KM" depending on your class.

Your Name My Game 15.5.20

Depending on which task you are saving.

Then press save.
