Foldable Book Template Instructions

Courtesy of: <http://www.ThingsYouWillLearn.com>

Printing and Copying Instructions

(Note: These were created as A4 size. Printers will usually adjust appropriately when printed on letter size paper. I wasn't able to test and see how that effects the alignment of the pages once the book is folded.)

1. Print page 1 of the pdf file. Put this aside to use as a guide later.
2. Print the template you would like onto A4 paper. Check the alignment by test folding the template.
3. Use a standard photocopier to enlarge from A4 to A3 size. (Place the original directly onto the glass rather than using a document feeder. This will assure better alignment.)

How to use

1. For best fold the enlarged template into eighths, along the lines indicated. To prevent smearing of the ink complete the first folds and creases with the printed side facing inward.
2. After the first folding and creasing, fold and crease again in the opposite direction.
3. Using the page numbers as a guide have students add the illustrations and content appropriate for your lesson.
4. After all content has been added fold along the center line that is perpendicular to the dotted line.
5. Cut along the dotted line to the indicated tick mark.
6. Unfold and fold along the line that was just cut.
7. Holding the and right sides together push them toward each other. This should push the center pages out in a plus shape.
8. Fold the pages, creating the booklet.
